

This is Wilhelm Röntgen.

Röntgen won the first Nobel prize in physics. He dedicated a lot of time and energy into discovering x-rays over a hundred years ago.

We are Creative Electron, makers of the TruView™ X-ray inspection platform. We've spent years engineering the most robust and versatile x-ray machines.

X-rays allow you to see electrical, medical, and automotive components differently.

Easily inspect, analyze, and count your inventory using our x-ray technology.

See a live demo of your component and discover how x-rays can make your process more efficient.

You don't have to rediscover x-rays or engineer anything. You don't even have to grow a beard. All you have to do is visit our website.

Contact us today and find out how to take advantage of the TruView™ platform to see inside your products.

Don't wait another hundred years.
